Professional Summary

Software engineer and team lead with 17 years of experience spanning front-end engineering, full-stack collaboration, project delivery, and team development. Strong in React, TypeScript, modern front-end tooling, unit and E2E testing, performance optimization, and continuous delivery. Experienced in working on-site with U.S. clients and collaborating in English across international teams.

Core Skills

- **Front End:** React, JavaScript, TypeScript, Vite, Webpack
- **Back End & Data:** Node.js, Express, NestJS, Python, C#, PostgreSQL, MySQL, MongoDB, SQLite
- **Quality & Delivery:** Jest, Vitest, Playwright, GitHub Actions, Docker, Docker Compose, Scrum
- **Cloud & Platforms:** Microsoft Azure, AWS, WeChat Mini Programs, WeChat Official Accounts; Linux, macOS, Windows
- **AI-Assisted Engineering:** ChatGPT, Codex, Gemini, and Qwen for development, code review, testing, and technical research
- **Applied AI Skills:** Custom skill creation, MCP integration, and spec-driven development

Professional Experience

Baizhen Biotechnology (Wuhan) Co., Ltd. | Senior Front-End Engineer | Jun 2022–Jul 2026

- Developed the React front end for **PEAKS Online**, a browser-based protein sequencing product, collaborating with the Canadian team from requirement analysis through delivery.
- Led performance improvements, dependency upgrades, unit testing, and E2E automation; also contributed to Java back-end development and code reviews.

Wistron Information Technology & Services Co., Ltd. | Team Lead / Front-End Engineer | Aug 2015–Jun 2022

- Led project delivery, front-end development, team mentoring, and technical training; worked on-site in California to clarify requirements and coordinate delivery.
- **EWT:** Transformed the product backlog into user stories across seven sprints and enabled one production release in every sprint.
- **CEP:** Quickly filled a React development gap, earned code-review privileges, mentored new front-end contributors, and delivered department-wide React training.

Wuhan KOTEI Informatics Co., Ltd. | Project Manager / C# Developer | Jul 2009–Jul 2015

- Managed requirements, architecture, development, deployment, and on-site delivery for government information systems while leading the team's customer response.
- Introduced Prism MVVM, AutoMapper, and T4 code generation to improve collaboration and reduce repetitive development.

Selected Projects

PEAKS Online — Protein Sequencing SaaS | React, Java, E2E Automation
Delivered core front-end features, performance optimization, test automation, and dependency upgrades while collaborating continuously with the Canadian team and applying AI-assisted development and review.

Hubei Provincial Land Resources Petition System | Project Management, Architecture, Data Visualization
Directed requirements, architecture, deployment, and on-site integration. The solution earned client recognition and was demonstrated at a provincial-level conference.

Education & Additional Information

- China University of Geosciences (Wuhan) | B.S. in Computer Science and Technology | 2023–2026
- Wuhan Language and Culture Vocational College | Diploma in Computer Software Technology | 2006–2009
- Professional working English; multiple on-site engagements with overseas clients; holder of long-term U.S. and Canadian visas
- **Interests:** Tennis, road cycling, and strength training
- **Target Roles:** Senior Front-End Engineer / Full-Stack Engineer / Project Manager | **Expected Salary:** RMB 25K–30K/month
