Alex Qin (Qianjin Qin)

Senior Frontend Engineer · Full-Stack Engineer · Technical Team Lead

Wuhan, China

PROFESSIONAL SUMMARY

Senior engineer and team lead with 17 years in software delivery, including 5+ years specializing in enterprise frontend development. Strong in React, TypeScript, frontend architecture, scalable component systems, performance optimization, and modern engineering practices. Experienced in technical solution design, code review, mentoring, and English collaboration across international teams.

CORE SKILLS

Frontend	React, React Hooks, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, responsive design, Vite, Webpack
Architecture	Frontend architecture, reusable component systems, state management, design patterns, technical solution design
Backend & Data	Java, Node.js, Express, NestJS, REST APIs, PostgreSQL, MySQL, MongoDB, SQLite, Python, C#
Quality & Delivery	Code review, Jest, Vitest, Playwright, Git, CI/CD, GitHub Actions, Docker, Scrum
Cloud & Platforms	Microsoft Azure, AWS, WeChat Mini Programs, WeChat Official Accounts; Linux, macOS, Windows
AI-Assisted Engineering	ChatGPT, Codex, Gemini, and Qwen for development, code review, testing, and technical research
AI Agents	Agent workflow design, task decomposition, context management, prompt design, tool use and MCP integration, custom skills, spec-driven development, output validation and human review; RAG: document chunking, embeddings, vector retrieval, context augmentation, and retrieval quality evaluation	

PROFESSIONAL EXPERIENCE

Baizhen Biotechnology (Wuhan) Co., Ltd. — Jun 2022–Jul 2026

Senior Front-End Engineer

- Designed and developed the React and TypeScript frontend for **PEAKS Online**, an enterprise browser-based protein sequencing product backed by Java and PostgreSQL.
- Contributed to frontend architecture, application structure, reusable components, development standards, and key technical solution decisions.
- Improved maintainability and delivery quality through performance optimization, dependency upgrades, code reviews, unit testing, and E2E automation.
- Integrated Java REST APIs, contributed to selected backend work, mentored developers, and used Codex and Gemini to accelerate implementation, debugging, and technical exploration.

Wistron Information Technology & Services Co., Ltd. — Aug 2015–Jun 2022

Team Lead / Front-End Engineer

- Led project delivery, front-end development, team mentoring, and technical training; worked on-site in California to clarify requirements and coordinate delivery.
- **EWT:** Transformed the product backlog into user stories across seven sprints and enabled one production release in every sprint.
- **CEP:** Quickly filled a React development gap, earned code-review privileges, mentored new front-end contributors, and delivered department-wide React training.

Wuhan KOTEI Informatics Co., Ltd. — Jul 2009–Jul 2015

Project Manager / C# Developer

- Managed requirements, architecture, development, deployment, and on-site delivery for government information systems while leading the team's customer response.
- Introduced Prism MVVM, AutoMapper, and T4 code generation to improve collaboration and reduce repetitive development.

SELECTED PROJECTS

PEAKS Online — Protein Sequencing SaaS

React · TypeScript · Java · PostgreSQL

Delivered core frontend features, architecture improvements, reusable components, performance optimization, and automated testing in close collaboration with the Canadian team.

Hubei Provincial Land Resources Petition System

Project Management · Architecture · Data Visualization

Directed requirements, architecture, deployment, and on-site integration. The solution earned client recognition and was demonstrated at a provincial-level conference.

EDUCATION & ADDITIONAL INFORMATION

- China University of Geosciences (Wuhan) | B.S. in Computer Science and Technology | 2023–2026
- Wuhan Language and Culture Vocational College | Diploma in Computer Software Technology | 2006–2009
- Professional working English; multiple on-site engagements with overseas clients; holder of long-term U.S. and Canadian visas
- **Interests:** Tennis, road cycling, and strength training
- **Target Roles:** Senior Front-End Engineer / Full-Stack Engineer / Project Manager | **Expected Salary:** RMB 25K–30K/month
